

UNIT OUTLINE FOR HSC212.9 CHILD AND ADOLESCENT COUNSELLING

Name of Unit 1 (Unit Code 1)

Child and Adolescent Counselling (HSC212.9)

SECTION 1 – GENERAL INFORMATION

Administrative details

Associated higher education awards <i>(for example, Bachelor, Diploma)</i>	Duration <i>(for example, one semester, full year)</i>	Level <i>(for example, introductory, intermediate, advanced level, 1st year, 2nd year, 3rd year)</i>	Unit Coordinator <i>(incl. academic title)</i>
Master of Counselling Practice	One semester	Advanced	Olivia Kearney

Core or elective unit

Indicate if the unit is a

- core unit
 elective unit
 other (please specify below):

Unit weighting

Using the table below, indicate the credit point weighting of this unit and the credit point total for the course of study (for example, 10 credit points for the unit and 320 credit points for the course of study).

Unit credit points <i>Example: 10 credit points</i>	Total course credit points <i>Example: 320 credit points</i>
6	96

Student workload

Using the table below, indicate the expected student workload per week for this unit.

No. timetabled hours per week*	No. personal study hours per week**	Total workload hours per week***
3	6	9

For those students requiring additional English language support, how many additional hours per week is it expected that they will undertake?

Additional English language support: 0 hours per week

Pre-requisites and co-requisites

Are students required to have undertaken a prerequisite or co-requisite unit for this unit?

- Yes No

If **YES**, provide details of the prerequisite or co-requisite requirements below.

HSC200.8 Counselling Skills (prerequisite)
HSC201.8 Introduction to Counselling Theory (prerequisite)

SECTION 2 – ACADEMIC DETAILS

Unit Descriptor

Provide below a brief unit description, which includes a summary of the key content of the unit.

This unit introduces students to the developmental stages of childhood and adolescence and the neurobiological changes that accompany them. It explores the various problems that present during this stage of life and the therapeutic modalities that have been developed to address them. The complexity of treatment is highlighted and students are invited to consider the legal, cultural, and ethical issues that factor into the therapeutic process as well as the impact on the parent-child relationship and the wider family. Finally, this unit challenges students to reflect on how their own childhood experiences shape them as practitioners and dispose them toward certain treatment modalities.

Learning Outcomes for the Unit

Learning outcomes for unit:

1. Explain how neurobiology fundamentally shapes human growth and capacity in the context of early life relationships
2. Differentiate the therapeutic goals and modalities appropriate to the developmental stages of childhood and adolescence
- 3.
4. Justify the suitability of therapeutic modalities for the effective treatment of various presentations involving children, adolescents, and their families
- 5.
6. Determine how personal childhood experiences impact self-understanding, worldviews, and treatment modality preferences

Assessment tasks			
Type * <i>(see examples noted below this table)</i>	Learning Outcome/s assessed	When assessed – year, session and week <i>(for example, year 1, semester 1, week 1)</i>	Weighting <i>(% of total marks for unit)</i>
<p>Reflective Journal</p> <p>Students will be asked to submit four short reflections based on the coursework in a journal format. The reflections should be considered and critically reflect on how their own childhood experiences have impacted them personally and as practitioners. 1,000 words</p>	2, 4, 6	Week 2, 5, 8, 12	20%
<p>Case Study</p> <p>Analyse the provided case studies and consider the cultural, legal and ethical implications. Demonstrate professional judgement in the development of two scripts, one for the parent and one for the child, in which you address these issues. These scripts should consider how this information is relayed in order to establish therapeutic alliance. 1,500 words</p>	1,	Week 7	25%
<p>Research Paper</p> <p>Choose a childhood disorder from a list given to you and conduct research to investigate the following topics:</p> <ul style="list-style-type: none"> • Diagnostic criteria of the disorder • Brief history/background information • Epidemiology • Aetiology • Treatment <p>2,000 words</p>	2, 4	Week 10	30%

Assessment tasks			
Type * (see examples noted below this table)	Learning Outcome/s assessed	When assessed – year, session and week (for example, year 1, semester 1, week 1)	Weighting (% of total marks for unit)
Case Formulation Read the provided case study and prepare a case formulation for a supervisor that demonstrates consideration for developmental stages and neurobiology. As part of this formulation, develop, critically appraise, and justify treatment goals and a treatment modality. 1,500 words	2, 4,	Week 13	25%

2.1 Prescribed and recommended readings

Provide below, in formal reference format, a list of the prescribed and recommended readings for the unit.
